

Question 12

Q: How can the Femtet operations be automated?

A:

- Dimensions, materials, and boundary conditions can be parametrically changed in the parametric analysis.
- Femtet implements the Microsoft Visual Basic® macro functions. The macros can automate Femtet operations such as modeling, calculation, and result display. The macros are described using VBA and can be executed in conjunction with Excel.

Please refer to the tutorial of the macro help menu below for more information.
