

Question 10

Q: How to check the results of the parametric analysis?

A: Click ▼ at the side of [Run Mesher/Solver] and select [Parametric Analysis] on the submenu to open the [Parametric Analysis] dialog box.

Select [Save Results (Field, Table)] on the [Output Setting] tab. After setting parameters and executing the calculation, click [Results] on the project tree to display the pull-down menu. The result of the desired parameter can be selected from the menu.
