

Question 10

Q: How to obtain heat balance or heat transfer balance from the analysis result?

A: The heat balance in the result table will quantitatively give you heat inflow and outflow due to thermal conductivity, convection, and radiation for each body attribute.

Please refer to the Femtet help menu below for more information.

Home>Technical Notes>Thermal Analysis>Results Obtained in the Thermal Analysis (Table)

The tool below can visualize the heat path for a rough idea of the heat flow.
