

Rustool Instruction

Femtet

🛑 Murata Software

RusTool is a tool used to extract PC information when applying for a trial Femtet license or to update a Femtet license in use.

(RUS=Remote Update System)

A license driver is installed or updateda at the same time as the RusTool installation.

* Trial version means "Free with full functions version".

Licensing Flow

- 1. Download and install Rustool
- 2. Create a license file (c2v file) with Administrator privileges
- 3. Apply for the official/trial version from the website
- 4. A license application file (v2c) will be sent to you so you can apply it with Rustool.
- 5. Download and install Femtet
- 6. Check if Femtet can be started.

*The order of 4,5 is arbitrary.

C2V = Customer to Vendor V2C = Vendor to Customer

License Management Tool	Free with Full Functions
License Update Tool RusTool is a license update tool and used to acquire "c2v" file.	You can use all of the functions of Femtet free of charge for 60 days. See <u>FAQ's</u> for system requirements. 1) Create a c2v file with <u>License Update Tool (RusTool)</u> (7) IP: 29MB) on the computer/server where you want to save the license. Note that the license is not transferable to other computer. If you have a difficulty to install RusTool, please read page 5 of RusTool manual.
Download license update tool (RusTool). [] (ZIP: 29MB for both 32bit and 64bit editions)	 2) Fill in "Application for Trial" and attach the c2v file. 3) Read and agree to "License Agreement".
License Manual	 4) Press [Review Your Application] and submit. We will send you a trial license key (v2c file) upon receipt of your application. Please note that you must belong to a corporation to use this software. We may decline your application depending on the examination result of your application.

If no license is on the list, it may not have been installed for some reason. In such cases, please contact us via our website.

Uninstall(Not mandatory)

*Rustool is also used when updating licenses, so basically no uninstallation is required.

Open Control Panel and [Programs] > [Unitall a program]

Select Femtet RusTool from the list of installed programs from right click menu, click Unistall.

Additional Informations

🛑 Murata Software

Client PC

Server Authentication

Update your license server PC Rustool regularly to the latest version.

If you only repeat the Femtet update on the client PC, an authentication error may occur if the license driver version on the license server PC becomes out of date.

License transfer is not supported.
